***EN 160001 Compliance and
"How to make your M+T system work for its
keep" lessons learned on multi site installations***

Presented by

Michael McNerney

Synopsis of Lecture

Michael Mc Nerney, Energy Manager for Tesco Ireland will examine how to maximise the value of the information provided by Today's energy management systems. Assuming that the audience is familiar with the basics of energy monitoring and targeting systems, Michael will explore methods and ways to make such systems deliver on their potential by providing useful and appropriate information to the end user. He will also look at some of the pitfalls and will discuss key performance indicators and benchmarking. He will discuss integrating external data streams into such a system to allow enhanced understanding and projection of energy consumption in a building. He will specifically deal with the challenges associated with managing a multi site multi region system to give clear and useful information. Finally, he will examine the latest developments in energy monitoring and targeting such as the "dash board" concept and project tracking.

Date: Wednesday 11th November 2009.

RSVP: Monday 9th November – Numbers need to be confirmed.
Anna Maria Murphy, Arup, Tel No. 021 422 3274 or
